

DRUMLANRIG CASTLE CASE STUDY

Nestled in the beautiful Queensberry Estate in Dumfries and Galloway, Drumlanrig Castle is an impressive category A listed castle. The castle and its stunning gardens are a fabulous backdrop to the many events held there.

Objectives

Drumlanrig Events needed a solution to provide Wi-Fi coverage for customers and traders in their events ground.

The project

Event connectivity

Corona IT Solutions designed and deployed a temporary set up to provide Wi-Fi around the Drumlanrig event ground for the seasons events. The set up used a point to multi-point antenna and outdoor high density wireless access points. This gave clear, uninterrupted coverage for traders and customers.

The set up was easily taken down at the end of each event and re-set up for the following event leaving no equipment on show when events weren't on.

Why Corona IT Solutions?

Corona IT Solutions was recommended to Drumlanrig Events due to their reputation of providing quality Wi-Fi solutions for outdoor events and festivals.
