

CASTLETOWN ESTATE & FARM

Nestled in the heart of the North West Cumbrian countryside and bordered by the refreshing rivers of Eden and Esk, lies the breathtaking and award-winning Castletown Estate and Farm. From innovative and sustainable farming practices to a spectacular wedding venue, Castletown truly has it all.

Objectives

Castletown Estate wanted to improve its communication lines, WiFi coverage and security measures across its expansive 4000-acre property.

We had a number of issues we needed to solve to bring the business into a more technology enabled world, this ranged from improved internet coverage, to remote CCTV and cloud computing. Corona were able to do it all with no fuss and in a very friendly and helpful manner. Thank you

Castletown Estate and Farm

The project

VoIP Phone System

As the VoIP phone system works through the internet, Castletown Estate has the convenience of accessing their calls from any location with a reliable internet connection. The VoIP phone system also offers enhanced communication and improved call quality as added benefits.

Starlink

The satellite internet service, Starlink, is an excellent solution for remote areas like Castletown Estate as it provides internet connection where traditional broadband providers cannot. With Starlink, the estate can now enjoy fast and reliable internet connections, enabling them to stay well connected.

CCTV

This installation provides security and peace of mind for Castletown Estate. Our system enables continuous monitoring, transmission, and recording of the property which can be accessed via their smartphones and tablets.

Ongoing support

Proactively in the background, our technicians keep a close eye on all the systems and detect any potential issues and action where necessary. This allows Castletown Estate to focus on other areas of their business.
