

GLASTONBURY

Located in the glorious fields of Somerset England, Glastonbury is one of the world's most anticipated festivals which attracts thousands of attendees from all over the world and features a who's who of the biggest artists in the music industry. Glastonbury is a must-visit event for those seeking a one-of-a-kind experience.

Objectives

We were tasked to develop a failover network for six of the primary bars at the event in case their main network failed.

The project

Event Connectivity

We set up a failover Wi-Fi network for 6 of the main bars that were dotted about the vast 900+ acre site. The failover was on standby in case the primary network incurred any disruptions. On the second day of the festival, our failover was successful in taking over the main network when it went down. Thanks to this failover, the bars were able to keep accepting card payments for the duration of the festival.

Why Corona IT Solutions?

At Corona IT Solutions, we fully recognise the uniqueness of every event, and we approach each one with that in mind. No matter what type of event you're planning, we're here to assist you in making it a resounding success.
