

MRS. ALICE

Launched in November 2019, Mrs. Alice is a Tablescape brand founded by Alice Naylor-Leyland. Offering enchanting, elegant tableware to take the hassle out of hosting, Alice's "Tablescape In A Box" was the first product of its kind, making the art of Tablescaping accessible worldwide.

Objectives

Mrs. Alice wanted to prioritise the productivity and success of the team by ensuring they had the tools they needed to succeed. They also wanted to limit any IT issues that may arise and keep operations running smoothly with ongoing IT support.

The project

Supply of New Hardware

After discussing Mrs. Alice's specific business needs, we recommended the best laptop specifications to enhance the company's productivity. To make the transition as seamless as possible, we also transferred all their old data to the new equipment with updated applications.

Ongoing Support

Technology can sometimes be complex and frustrating. Our team of technicians are available to help solve any issues that may arise with any equipment or software. We also provide regular maintenance checks to ensure that systems are running efficiently.

Why Corona IT Solutions?

Corona IT Solutions understand that not every business needs complex IT solutions. However, we are committed to helping you with even the simpler things to make sure your business is operating at its maximum potential.
