

PARKDALE GARAGE

Parkdale Garage, a well-established independent garage, has firmly established itself as a key player in the automobile industry within Dumfries and Galloway. Initially providing vehicle services such as MOTs and tyre replacements, the garage has now expanded its business and boasts a thriving used car dealership located at a secondary site in Dumfries.

Objectives

Parkdale Garage sought our expertise to provide reliable and efficient technology solutions to cater to the business needs of their new site.

The project

Starlink

Parkdale Garage now has access to internet speeds that are up to three times faster than traditional providers, thanks to our installation of a Starlink. With stronger connections, they can also browse the internet with minimal interference or downtime.

New Office Setup & Hardware

Our team worked closely with Parkdale Garage to gain a thorough overview of their daily operations and provided recommendations on equipment that would boost their productivity. The equipment consisted of computers, monitors, mobile phones, printers and much more.

Managed Service Agreement

By signing up as a managed service client, Parkdale Garage can rest assured that their equipment is being regularly monitored and that we will be readily available to assist them in case any issues arise.

As a result in our need to update our systems, Corona IT Solutions now provide us with IT and Telephony requirements, we view them as an extension to our business and the team at Corona are always committed and fully supportive of our demanding needs, we would highly recommend Arthur and his team.
